Garnacha Vino Especialidad

Garnacha is the Spanish, and therefore original name, for the increasingly fashionable grape known elsewhere as Grenache. It's most common and noblest form is the dark-berried and light-fleshed Garnacha Tinta. Garnacha is Spain's second most planted red wine Grape after Tempranillo. Grown particularly in the north east regions of Spain from Rioja, where it is often blended with Tempranillo, to Priorat, Monsants and futher south to the areas surrounding Madrid such as Mentrida where it becomes the dominant variety and the true star of the wine. In the latter regions the Garnacha is dry grown, on ancient bush vines which are generally organically and biodynamicly managed, sometimes producing as little as 500g of fruit per vine.

Grenache was one of the first varieties to be introduced to Australia; a clone from Perpignan arrived in Australia with James Busby in his 1832 collection. More significant was the introduction into South Australia of new cuttings from the south of France by Dr Christopher Rawson Penfold in 1844. Plantings in South Australia boomed, particularly in McLaren Vale, the Barossa Valley and Clare Valley. Until the mid 20th century Grenache was Australia's most widely planted red wine grape variety though very few of these original vineyards remain. The old vineyards are now sought after by wine makers in South Australia. These dry grown, low yielding, ancient vineyards are producing some of the best fruit in the region. Coupled with young, innovative wine makers, and a more burgundian approach to wine making, the old vine grenache is fast becoming a must for wine lovers.

We have put together a selection of Spanish and Australian Garnacha that we think show the true Varietal characteristics of Garnacha and highlights the power and finesse that the variety has to offer.
